

Pevco Compact Delivery Station™

- > With high-volume capacity and multiple installation options, **Pevco's Compact Delivery Station™** meets the dynamic material delivery requirements of pharmacies, labs, ORs, ERs and patient areas.

Wall-recessed Compact stations are supported by a sturdy steel pedestal within the wall and finished with a matching trim frame.

Pevco's Compact Delivery Station features:

- A slim 24" x 18" footprint
- Side-by-side installation options to serve the busiest material transport areas
- An optional integrated carrier storage unit
- Easy-to-use Pevco V-Panel™ or Smart Panel™ controls
- An optional Pevco Security Door to restrict unauthorized access
- Compatibility with both 4" and 6" tube systems

Pevco Compact Stations can be installed on an existing counter when floor space is at a premium.

Depending on a facility's specific needs and available space, this versatile pneumatic tube station can be recessed into a wall, placed on a counter or can stand alone on its own integrated steel pedestal. When placed side-by-side, several Compact stations can serve as a transaction hub for the busiest of departments. To maximize system throughput, individual stations can be configured to link directly to stations within the busiest areas of a hospital reducing total transaction time.
